RESEARCH OBJECTIVE

I am a PhD student at the EPSRC sponsored CDT for *Cybersecurity for the Everyday* examining AI-driven technologies and their adverse impact on marginalized populations. My work includes studying AI harms in the context of border control and intimate partner violence.

EDUCATION

Royal Holloway, University of London

PhD in Information Security, Advisors: Prof. Rikke Jensen, Dr. Maryam Mehrnezhad

Surrey, UK

Sep 2023 – Present

Jadavpur University

MA in Sociology, Advisor: Prof. Amites Mukhopadhyay

Kolkata, India

Aug 2020 – May 2022

RESEARCH INTERESTS

AI Ethics for non-WEIRD Societies · Border Protection Technologies · Human-Centred AI · AI ESG Frameworks

EXPERIENCE

King's College London

Graduate Research Assistant

London, UK

Feb 2025 – Sept 2025

- Co-led patent analysis, regulatory horizon scanning, and participatory governance for identifying **risky** AI patents on Lens.org
- Developed search strings and annotation protocols to identify and classify security-related AI patents
- Annotated 250+ patents following standardized protocols, assigning risk categories based on EU AI Act classifications to create training datasets for automated risk assessment
- Conducted interviews of researchers within technology centric civil society organizations to understand the need of a patent based AI risk assessment tool.
- Performed thematic analysis on interviews and co-authored a paper.

Max Planck Institute for Security and Privacy

Research Intern

Bochum, Germany

Dec 2024 – August 2025

- Conducted semi-structured interviews with 20+ AI developers and practitioners across UK, Europe, US, and Canada investigating ethical frameworks application in real-world settings
- Performed qualitative analysis including transcript annotation and inductive coding to identify key themes in practitioner engagement with AI ethics tools
- Investigating communication and interoperability between AI ethical frameworks to support consistent application in development workflows
